

Oracle EPM Cloud Services

Drive Integrated Planning & Budgeting,
Automate Account Reconciliation, and
Accelerate Your Financial Close

A photograph of three business professionals in an office setting. A man in a dark suit and tie is smiling and gesturing with his hand while talking to a woman and another man. The image is partially obscured by a blue diagonal overlay.

About Rite

RiteSoftware is a global IT solutions provider constantly striving to improve outcomes by finding innovative solutions for business problems. We are an Oracle Partner and Oracle Cloud Service partner with deep expertise in implementing Oracle EPM Cloud.

Oracle EPM Cloud provides the insights needed to drive integrated business planning across the enterprise. Businesses can develop integrated plans across finance, HR, supply chain, and sales to get insights into costs and profitability, accelerate financial close, streamline account reconciliation, and improve decision-making.

We have extensive experience across Oracle EPM Cloud's product portfolio, including Planning and Budgeting, Financial Consolidation and Close, Account Reconciliation, Tax Reporting, Profitability and Cost Management, and Performance Reporting and Data Management.

ORACLE

Partner

Our Services

Readiness

We evaluate your current systems to understand your cloud readiness and provide critical insights into potential opportunities, risks, and areas of improvement

Implementation

Our proven, best-practice methodologies assess your customizations and industry-specific processes to ensure a fast and cost-effective implementation

Security

We develop a robust security and governance framework, install the latest security patches to stay-up-to-date, and run periodic threat and vulnerability assessments

Support

We proactively monitor your applications to identify areas of improvement and meet changing business needs, enabling your IT team to focus on strategic initiatives

Advisory

We define your cloud strategy and roadmap and help you select the right applications for migration based on your business, and IT needs

Integration

We ensure seamless and secure integration between Oracle EPM Cloud and your existing applications – both cloud and on-premise for real-time data transfer

Testing

Our advanced testing methodology and automated testing approach ensures that your applications deliver better performance, customer experience, and time-to-value

Planning and Budgeting Cloud Service (PBCS)

Oracle PBCS empowers businesses of any size to drive best-in-class planning and budgeting processes across the enterprise without any capital investments.

Key Features

- ✓ End-to-end planning, budgeting, and forecasting in the cloud
- ✓ Predictive planning and rolling forecasts based on historical data
- ✓ Integrated planning and management reporting
